Creating Groups (Teams) in Microsoft Teams
Create a study group from a class or create a club /organization group for Teams Meetings. To create a team, follow the prompts below.
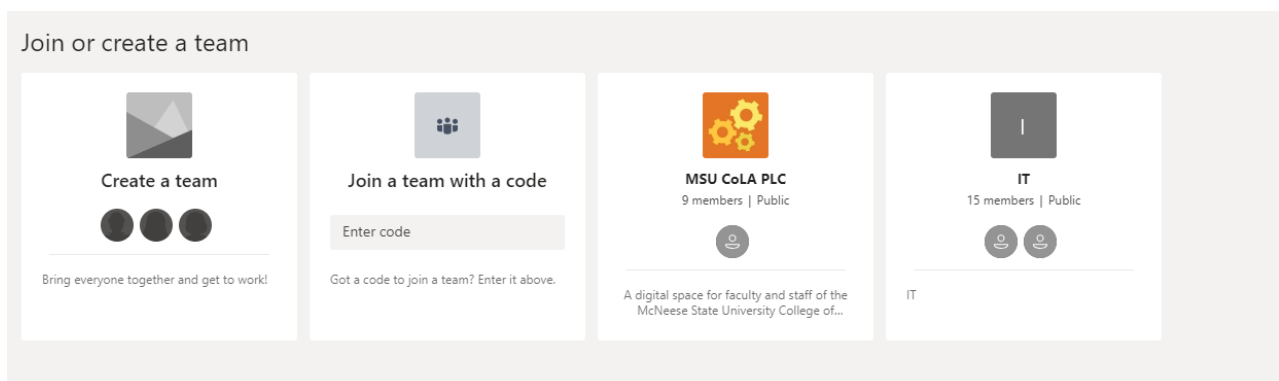

1. Open up the cloud version or downloaded version of Microsoft Teams App to Computer, tablet or phone.

2. Scroll to the "Teams" option.
3. Click "Join or create team" in the top right corner.

4. Click "create a team"

5. Give the team a name and set your privacy settings.

6. Click "Next"

Create your team

Collaborate closely with a group of people inside your organization based on project, initiative, or common interest. Watch a quick overview
